

If you had a crystal ball, you could see directly into your PET drying hopper and gain information that can help ward off process variations that could cost you machine time, material loss and additional energy consumption. Or you could simply get the same information from the EnergySmart™ PET Drying System from Conair.

With EnergySmart, you produce every preform with precision, every bottle with perfection. And you realize a tremendous reduction in energy consumption. Some processors have cut their energy consumption to as little as **0.069 kWh/kg.**

It's not magic. Just practical, profitable PET processing know-how. Contact the Conair PET Processing Experts today and get a FREE analysis of your potential energy savings and process improvements. Call 724.584.5500 or email PETprocessing@conairgroup.com.

You'll be more competitive in the world market. You'll be more profitable. We'll show you how.

Clairvoyant? No. Brilliant? Yes.

Look inside your process with real-time trending data. Early detection of process changes saves you time and money.

CONFIDENCE.
